

I have recently learned of the new proposal of limiting the Low Power stations of broadcasting to new LPFM stations. I am a listener of K-LOVE and support the way they broadcast with the positive programming that they provide in our local community. Their staff help people who are in need with the music they play and the calls they receive on a daily basis. They are an encouraging network and help those of us at work in the course of our hectic day to keep focused and stress free. It would not be in the best interest of our community airwaves for this new change.
